

5 Reasons to Choose

VIDEO VOICE  **Version 3.0**
Speech Training System™

for Your Therapy Needs

Schools, universities, hospitals and speech clinics around the globe enjoy the benefits of this innovative, computer-based speech therapy aid. Here are five reasons why:

Versatility. Video Voice offers facilities for *almost any type of speech work*, with *more than 30 games and colorful graphic displays* that give you new ways to illustrate speech. Relate pitch to colors in a spectrum . . . give “speeding tickets” for too much volume . . . move a train across a mountain range with easy onsets, continuous vocalization, or articulation target productions . . . teach sounds with a “gobble-the-dots” game . . . create pictures that show coarticulation and stress in connected speech . . . illustrate production of high-frequency sounds . . . and much more!

Adaptability ~ Video Voice is *appropriate for many age and ability levels* because you control the content and tailor operation to best meet individual needs. One therapist might use it for simple vowel production, another for /r/ work, and another for pitch or volume in connected speech. *What sounds? Which words? That's up to you!*

Flexibility ~ A single copy of Video Voice can be *shared by multiple therapists* on a single computer *without intermingling caseload data*. Discounted pricing is available for use on multiple computers, or to allow at-home practice outside therapy sessions.

Accountability ~ *Built-in recordkeeping and reporting* capabilities help you quantify performance and track progress over time in tabular or graphic form to *satisfy IEP mandates or insurance coverage requirements* or to support research studies.

Longevity ~ Over more than 20 years, Video Voice has developed into a comprehensive tool to meet a wide range of speech therapy needs. *Downloadable no-charge software updates* let you take advantage of new features and capabilities and make Video Voice a *valuable asset to your program for years* to come. Need help? Responsive, courteous *assistance from real people with real answers* is just a *toll-free phone call* away.
