

*~ Information & Pricing ~*

The Video Voice Speech Training gives Speech-Language Pathologists in educational or clinical settings a motivating and effective tool to enhance and accelerate therapy results. Its colorful games and graphic displays assist in speech development and remediation of a wide variety of speech disorders, with ages ranging from preschool to geriatric. Users enjoy **free software updates** via download from [www.videovoice.com](http://www.videovoice.com) and exceptional service and support by phone or email, from real people with real answers.

**System Features** ~ All games and displays are adjustable, letting the therapist control content and easily tailor the feedback to individual therapy needs. The only external hardware required is a microphone (USB recommended, included with Complete System). The program includes:

- ◆ Formant Displays (Matrix & Temporal) for **vowel and articulation training**
- ◆ P-A-R Displays for work on **non-segmental control and connected speech**
- ◆ Assessment Displays for **Hz and dB measurement**
- ◆ Extensive **Fun & Games** activities, most with **multiple speech goal** options
- ◆ Reports & Analysis Functions - single **session & cross-time reports, exportable data**
- ◆ Data Management Functions - **tools for handling your caseload information**
- ◆ **Embedded Demonstrations and Samples** illustrate operation of displays and games
- ◆ **Help Me Choose** - built-in training that makes getting started fast and easy
- ◆ Built-in Documentation (**context-sensitive Help, Solutions, Usage Tips**)
- ◆ Demonstration Program - **simulated operation explains program functions**
- ◆ **30-Day Free Trial** (no credit card or ongoing financial obligation)

**Computer Requirements & Recommendations**

Operating System	Windows 7, Vista, XP, 2000, NT; desktop or laptop
Hard Drive Space	100 MB (program, data requires additional storage space)
CPU Speed	500 MHz or higher (faster for better performance)
